Set up Azure account & create Computer Vision resource in Microsoft Azure

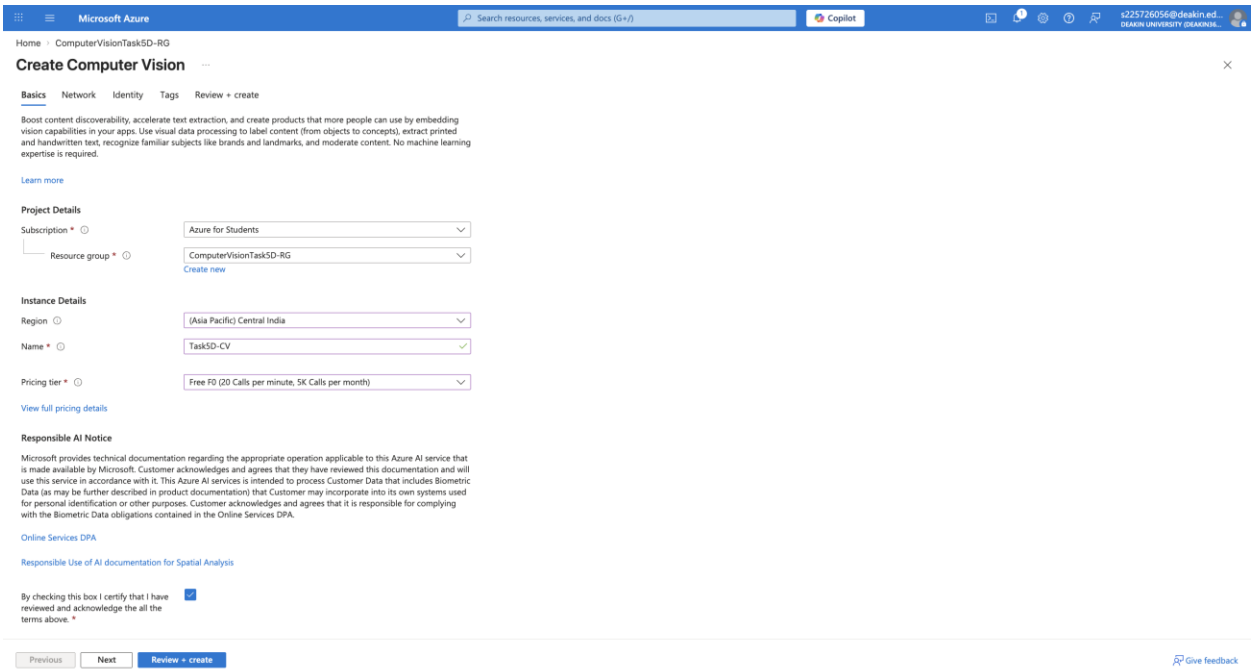
STEP-BY-STEP GUIDE:

CREATE THE RESOURCE

1. Go to **portal.azure.com** and sign in (or create a free account).

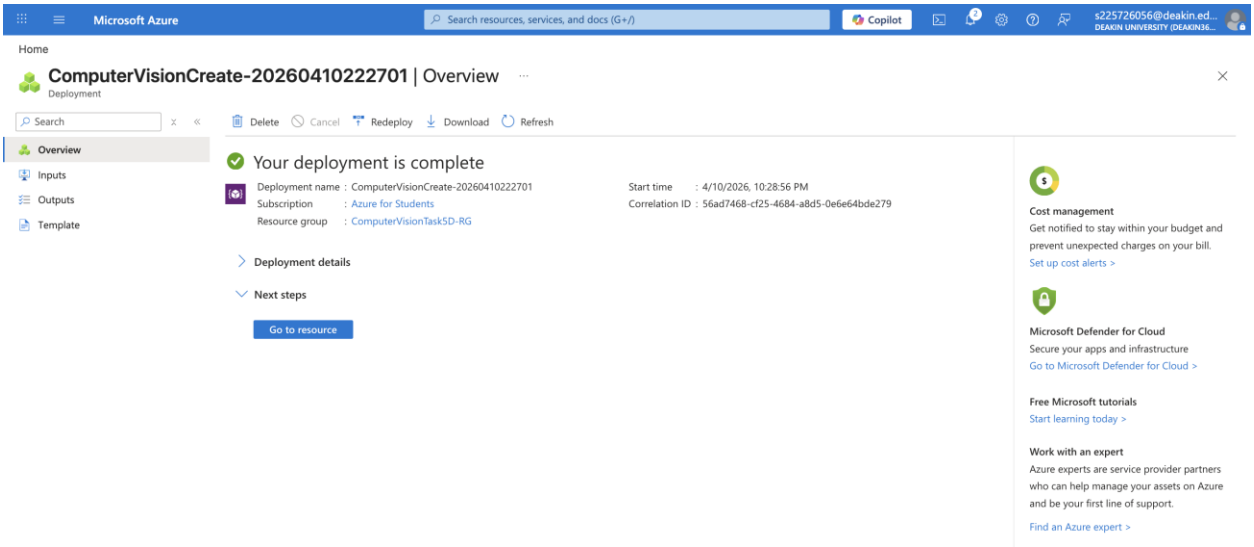
2. Click **Create a resource** → search for *Computer Vision* → select it.

3. Fill in the form:



4. Click **Review + Create** → **Create**. Wait ~1 minute.

5. Once deployed, click **Go to resource**.



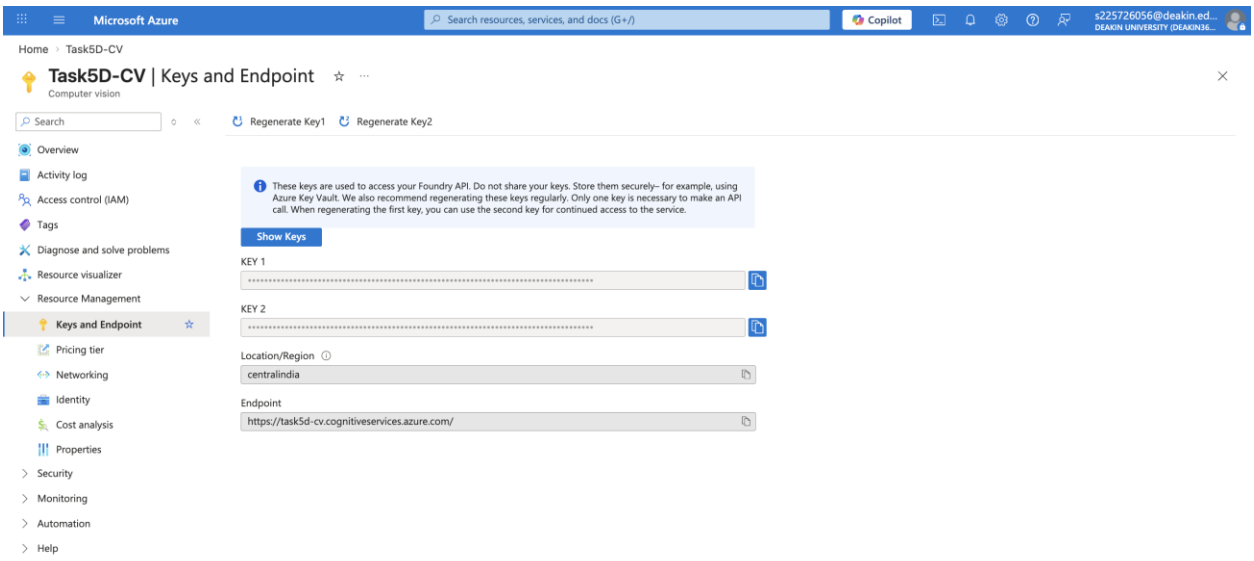
Note: Choose the Free F0 tier — it's sufficient for this project and costs nothing.

SAVING THE CREDENTIALS

From your resource page, click **Keys and Endpoint** in the left panel. Copy and save both values:

KEY 1: a1b2c3d4e5f6... (your API key)

ENDPOINT: https://task5d-cv.cognitiveservices.azure.com/



Tip: Never paste your API key directly in code. Use environment variables (shown in Step 3).
